2021 - 2025

Bachelors of Engineering in Information Technology (IT)

CERTIFICATIONS

- **HTML, CSS, and Javascript for Web Developers**
- **C for Everyone: Programming Fundamentals**
- **The Structured Query Language (SQL)**
- **Data structures and algorithms**

SKILLS

SUMMARY

Hello, I'm a **4th**-**semester student** pursuing Bachelors of engineering having a keen interest in Full Stack Development at Core.

Further, as for Programming I have good skills in working with **HTML, CSS, JavaScript** (Node JS, Express JS), **Python** (Pandas, Numpy, Matplotlib, **Django**, **Flask**), SQL, C and C++, **JAVA**. Apart from that I also have *basic* idea about the *MongoDB*, *React JS*.

Other than technical skills, I also like to take challenges like Problem Solving and do competitive programming.

PROJECTS

Campus Kits

- Technology used : **HTML, CSS, JavaScript**
- It is a website where electronic **IOT equipment** can be **purchased** or **rented** for use in academic projects.
- You can browse each item by category to see **what's popular**, **on sale**, etc..
- It's still being worked on.
- This website's backend will be added using **Node.js**, **Express.js**, **React.js**, and **MongoDB** to provide it backend functionality and make it completely functioning.
- Source code :

Trimit (URL Shortner)

- Technology used : **Python, Flask, Schema.sql ,HTML, CSS, JavaScript, Database.**
- You can **short** and **manage** your **link** just *one click*. You need to connect audiences worldwide, manage links and create brand relationships.
- Be able to **track**, **capture** & **retarget** everyone who clicks on your links through **Facebook**, **Instagram**, **Twitter**, **Linkedin**, and **Google Ads**..
